**EVENTS 2017:
QUALITY ROUNDTABLE
& FUTURE PV**

TWO PREMIUM PLATFORMS FOCUSING ON
QUALITY & INNOVATION IN PHOTOVOLTAICS
GATHERING EXPERTS AND
KEY PLAYERS IN THE INDUSTRY

→ PV MAGAZINE QUALITY ROUNDTABLE SERIES

Since 2015 pv magazine has been hosting its Quality Roundtable events, which are highly interactive workshops addressing investors, EPCs, installers, project developers and manufacturers.

FORTHCOMING EVENT:

5th pv magazine Quality Roundtable

WHERE:

at **Intersolar Europe** ICM Conference Center, Messe München, June 1, 2.30 pm to 5 pm, in Munich, room 5

Future roundtables to come at:

SPI Las Vegas, REI Greater Noida, PV Taiwan Taipei

WHAT:

At the 2017 Quality Roundtable Europe, key questions regarding quality will be defined in granular detail in interviews with investors and a survey on quality, with invited experts providing input into how quality can be maintained, and poor outcomes avoided. As with previous Quality Roundtable events, all participants will be invited into this crucial discussion.

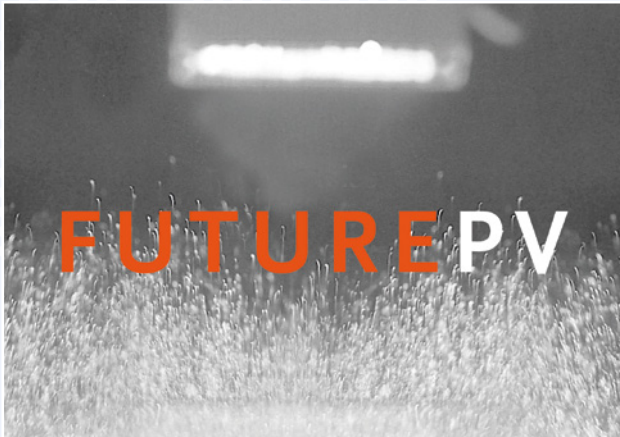

WHY BECOMING A SPONSOR:

- » Align your company with an engaging event where key players and experts discuss measures to promote quality and reliability
- » Benefit from pv magazine's broad media portfolio with multi language print and online platforms which drive interest and address your target audience

→ FUTURE PV SERIES

Since 2014 pv magazine has been providing leading coverage and agenda-setting discussions in cutting edge technology under the banner Future PV. In 2017 this special focus continues with a series of in-depth magazine and online features on cell technologies, high efficiency modules, materials, equipment and progress in the EPC business approaches to installation.

FORTHCOMING EVENT:

Pushing the boundaries: the latest steps to decrease LCOE

WHERE:

at **Intersolar Europe** ICM Conference Center, Messe München, June 1, 12 pm to 2 pm in Munich, room 5

WHAT:

Future PV at Intersolar Europe 2017 will focus on the cost reduction potential of technological developments on the cell or module level and also within the EPC sector. The technologies featured are being newly applied today, or are just around the corner of commercialization.

WHY BECOMING A SPONSOR:

- » Present your company as a pioneer in new technologies and product development
- » Benefit from pv magazine's broad media portfolio with multi language print and online platforms which drive interest and address your target audience
