RISK & INSURANCE
CONSULTING**

UNDERSTANDING THE IMPACTS OF RISK FROM DAY ONE

Decisions that impact project insurability are made at the beginning of the project lifecycle, but insurance program structure and cost are often missed at this stage, sometimes causing significant fiscal challenges for the project at financing and beyond.

Insurance costs are a significant financial burden on renewable energy projects, and the long-term profitability of a project requires a more sound understanding of insurability in the development stage.

Smart developers know that in today's market, incorporating accurate insurance projections from Cirrus at the front end yields substantial benefits over the life of the project.

OUR SERVICES

RISK AND INSURABILITY REPORT

The Cirrus Risk and Insurability Report is unlike anything else in the market, providing analysis of all essential insurance-related issues facing a project from the earliest phases of development. The Cirrus report addresses opportunities for risk mitigation, and highlights insurance pricing and program considerations that are critical to financing and long-term project profitability.

OTHER SERVICES

RISK & INSURABILITY REPORT KEY BENEFITS

Critical insight into project-specific natural catastrophe exposures associated with the project's intended location and/or guidance into siting decisions.

Technology and loss-control mitigation advice that can lead to significant insurance cost-savings.

Accurate insurance cost projections and program structure based on project-specific risk profile and up to date market conditions.

Exclusive access to VDE's one-of-a-kind natural catastrophe model developed specifically to address hail risk to solar projects.

Depth and scope of review related to insurance issues that are not provided by other types of project development advisers.

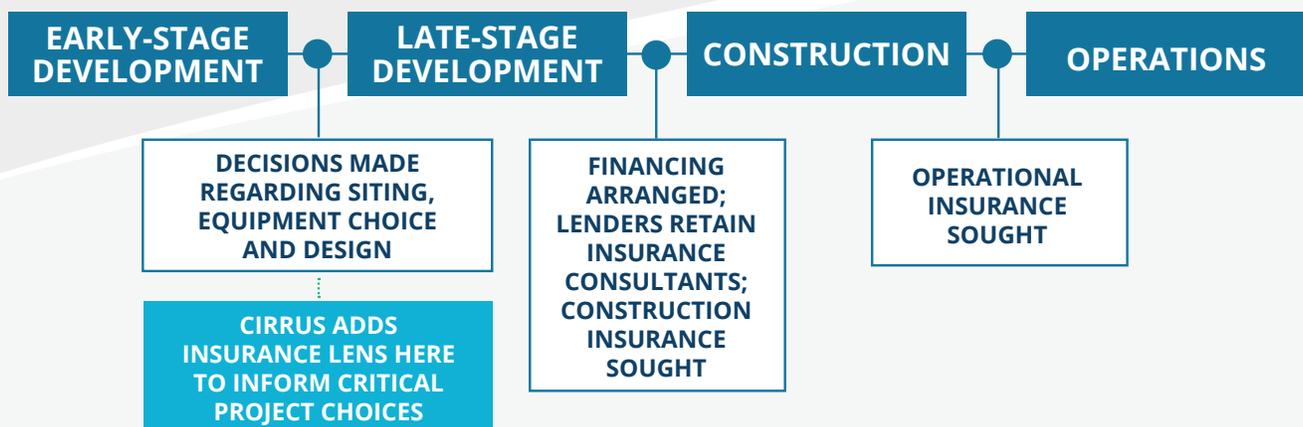

Option to update the report to reflect project status in preparation for due diligence documentation submission to lenders.

Information needed to avoid delays in the financing process and mitigate lender demands for conservative and expensive insurance program structures.

PROJECT LIFECYCLE TIMELINE

ABOUT CIRRUS

Cirrus was launched by a team of seasoned renewable energy insurance experts who saw a need to help the industry more accurately project and plan for insurability considerations earlier on in the development cycle, thereby enabling a faster and more profitable global energy transition.
