# AI or not AI for fault prediction and climate risk assessment in solar plants: misconceptions and facts

**Anne Fischer**  
Senior editor  
pv magazine

**Govinda Upadhyay**  
CEO and Founder  
SmartHelio

**David Ebner**  
Project Engineer  
Verbund Green Power

**Luc Hossenlopp**  
CTO Digitization Energy BU  
Schneider Electric

# Welcome!

**Do you have any questions?** ? 

Send them in via the Q&A tab.  We aim to answer as many as we can today!

You can also let us know of any tech problems there.

**We are recording this webinar today.** 

We'll let you know by email where to find it and the slide deck, so you can re-watch it at your convenience.  

# The fastest path to **Net Zero**

Luc Hossenlopp  
Strategy & Innovation VP

Digital + Electric = Sustainable  
For Efficiency      For Decarbonization      Green and Smart Energy

# What decarbonization activities are pursued most **today**?

## Replace energy supply

Scope 1 & Scope 2

**54%**  
Sustainability messaging

**56%**  
Purchasing Renewables

**51%**  
Define ambition / set targets

## Reduce for efficiency & circularity

Scope 3

**42%**  
Distributed energy resources

**44%**  
Reducing consumption

**40%**  
Drive circularity

**42%**  
Supply chain decarbonization

## Electrify processes

**31%**  
Drive electrification

**29%**  
Drive EVs / e-mobility

# PV generalization of what we do for other assets

Switchgear, transformer, UPS, Cooling systems, Motors, Pumps, etc.

1. **USE AI, TOGETHER WITH ASSET PHYSIC DEEP EXPERTISE**, to enable predictive maintenance, lifetime extension and operation efficiency
2. **COMPLEMENT SOFTWARE WITH PEOPLE WHEN APPROPRIATE**, such as project contextualization or maintenance policy change
3. **CREATE TRUST AND TRANSPARENCY AT ALL LEVELS** from C-suite to on-ground staff, have a single source of truth
4. **MOVE TOWARD A BROADER SYSTEM APPROACH**, for instance PV feeding microgrid analytics

# Value perceived in the SmartHelio solution

Based on a pilot project result and extrapolation

1. **INCREASE PV USEABLE GENERATION** - WHILE MINIMIZING MAINTENANCE & EXTENDING LIFE  
*equivalent to an energy efficient action*
2. **SAFETY IMPROVEMENT** - OVERVOLTAGE and FIRE
3. **OPTIMIZE OVER TIME** – PERFORMANCE ASSESSMENT & UPGRADE

Life Is On

**Schneider**  
Electric

# Advanced data analytics for improved PV plant performance

David Ebner | Verbund Green Power  
pv magazine Webinar  
04.06.2023

# VERBUND at a glance

**129** VERBUND hydropower plants  
with over 8,300 MW capacity.

The GCA high-pressure natural gas grid is  
around **900** kilometres  
long.

APG's (Austrian Power Grid AG) national  
electricity grid has around **3,400**  
kilometres of transmission lines.

Up to **1/4** of total  
generation to come from  
solar and wind by 2030.

More than **500,000**  
private customers trusted VERBUND in  
2021.

# Data flow @ VERBUND

## IT & Data Science

## O&M

Wind / PV Plant

Database Information System (DBIS)

Control Center

SAP EAM

Data Collection

Data Processing

Data Visualisation

Workforce Mgmt.

- Standardized data acquisition
- Additional on-site sensors
- Pre-defined interface towards trading and grid operators
- Connection to DBIS

- Data validation and normalization
- KPI calculations
- Advanced Data Analytics
- Statistical modelling
- Physical modelling
- Interface Alarming, Monitoring & Reporting

- Real time visualisation of the complete Wind/PV fleet
- Historical data investigations
- Customised Dashboarding
- Optimization of maintenance scheduling
- Triggering of work orders and interface to SAP EAM

- Recurring inspections, maintenance and repair scheduler
- Digital log book administration
- Work order administration
- Spare part management
- Assignment of Resources

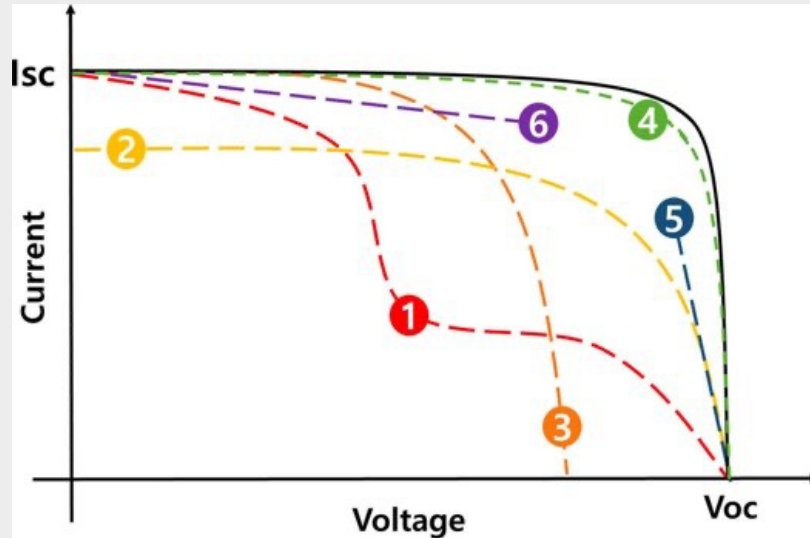

Central

Decentral

# Advanced data analytics models

## Physics based modelling

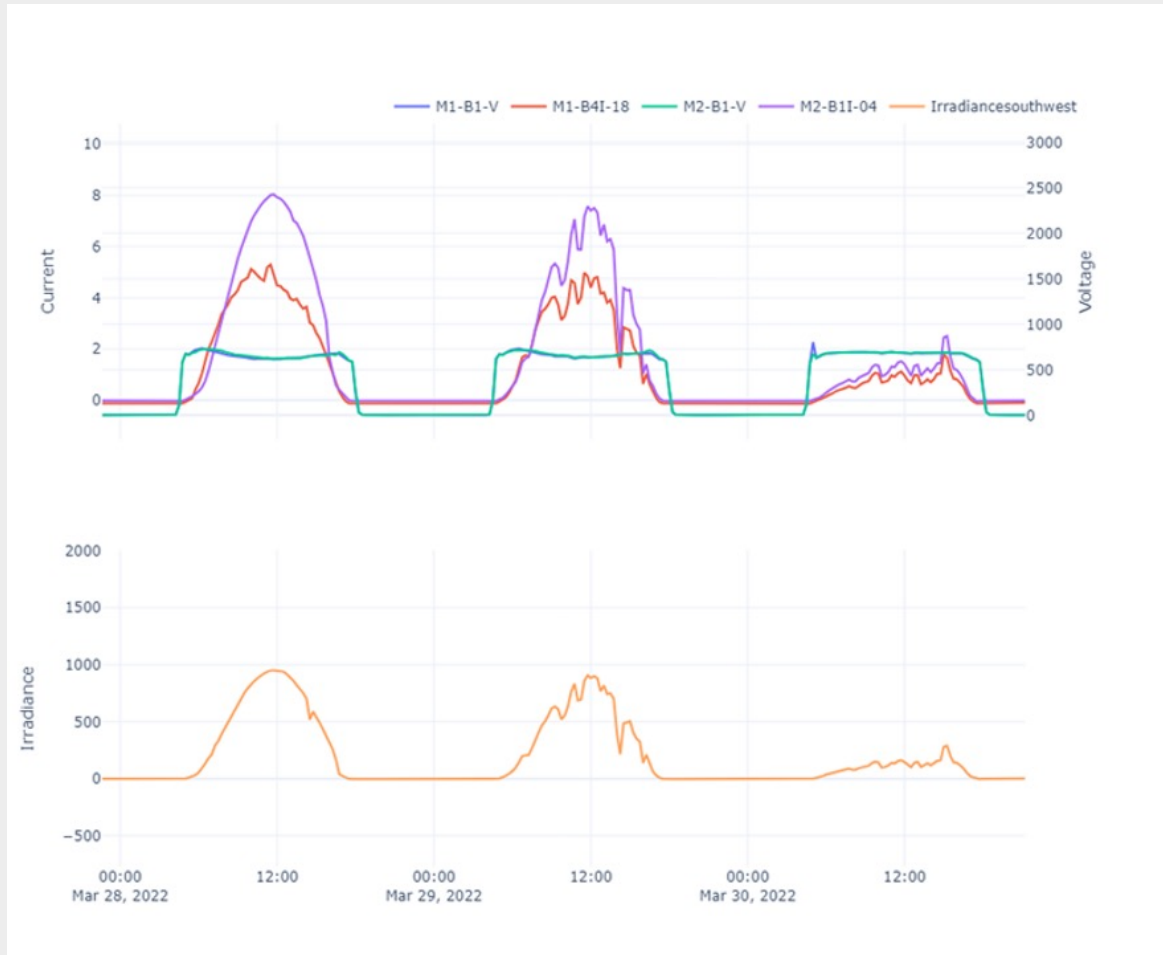

- Digital twin based on diode-equation
- Simplifications needed
- Low no. of data points
- Post-failure analysis & identification

## AI & Machine Learning

- Correlation based analysis
- Automatically identify correlative patterns
- High no. of data points
- Pre-failure prediction possible

# VERBUND X Accelerator: Cooperation with Smart Helio

*PV module damage identified due to abrupt decrease of current*

## Case study:

- SmartHelio analytics on historical data of 2 VERBUND PV plants
- Identification of underperformance
- Classification of failure type

## Example:

- PV Module damage identified
- Analytics allow identification **before** site visit
- Appropriate remedial action based on energy loss prediction and cost analysis

# The power of transition

Intelligent Software That Prevents  
Downtime In Solar Plants

Certified

This company meets the highest standards of social and environmental impact

Corporation

Govinda Upadhyay  
CEO & Founder

Lausanne, Switzerland | CA USA | New Delhi, India

# Team from big data, software and energy

30+ members | 50% industry | 50% researchers

## Govinda Upadhyay, CEO

- Serial entrepreneur
- **Climate Research**

## Neeraj Dasila, CTO

- Co-founder
- **Big Data**

## Maxine Cronier

- Head, Partnerships
- **Sustainable investment**

## Shankaransh Srivastava

- VP, Marketing
- **Solar asset management**

## Peter Gould

- VP, Operations
- **Cybersecurity**

# Real-time Fault Detection Software

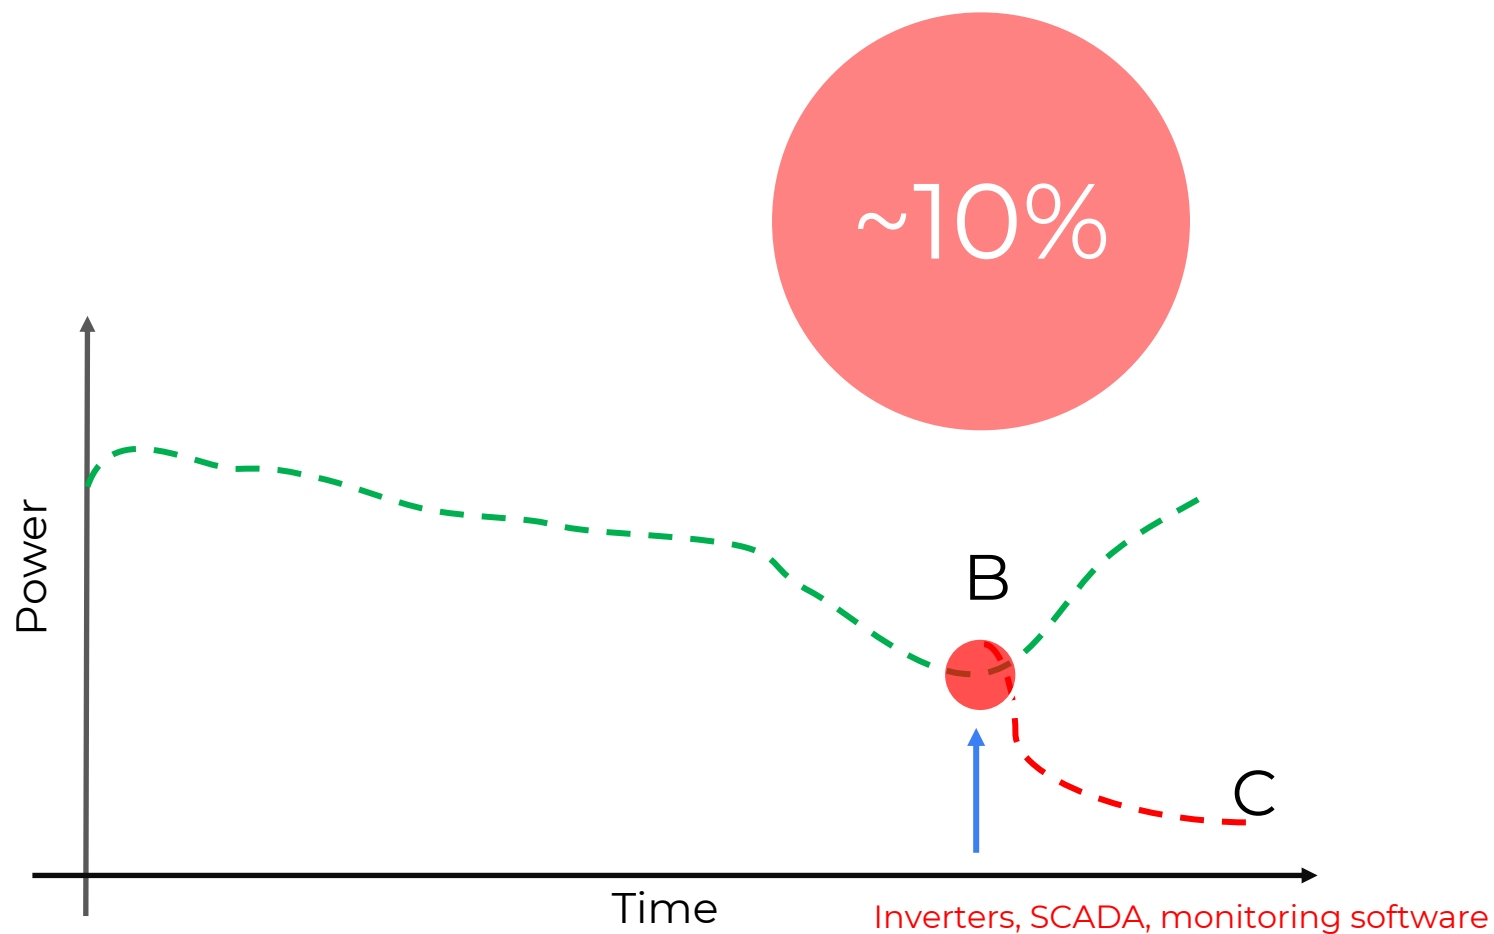

Prevent downtime in solar PV assets using **predictive analytics**

# Real-time Fault Detection Software

# Physics-informed AI Models

- 50+ **Physics based algorithms** require **90% less data** than usual AI systems
- **Inverter failure**, module level issues, connector/wiring issues, vegetation growth, tracker issues, shading, string disconnection, bad data, weather data etc.
- Highly **scalable**. Provide **results from day 1**. No Blackbox.

# Integrate to your Existing Software

Revenue Model: SaaS, Licensing, Pay per Fault

AI-driven automated plant onboarding

API integration

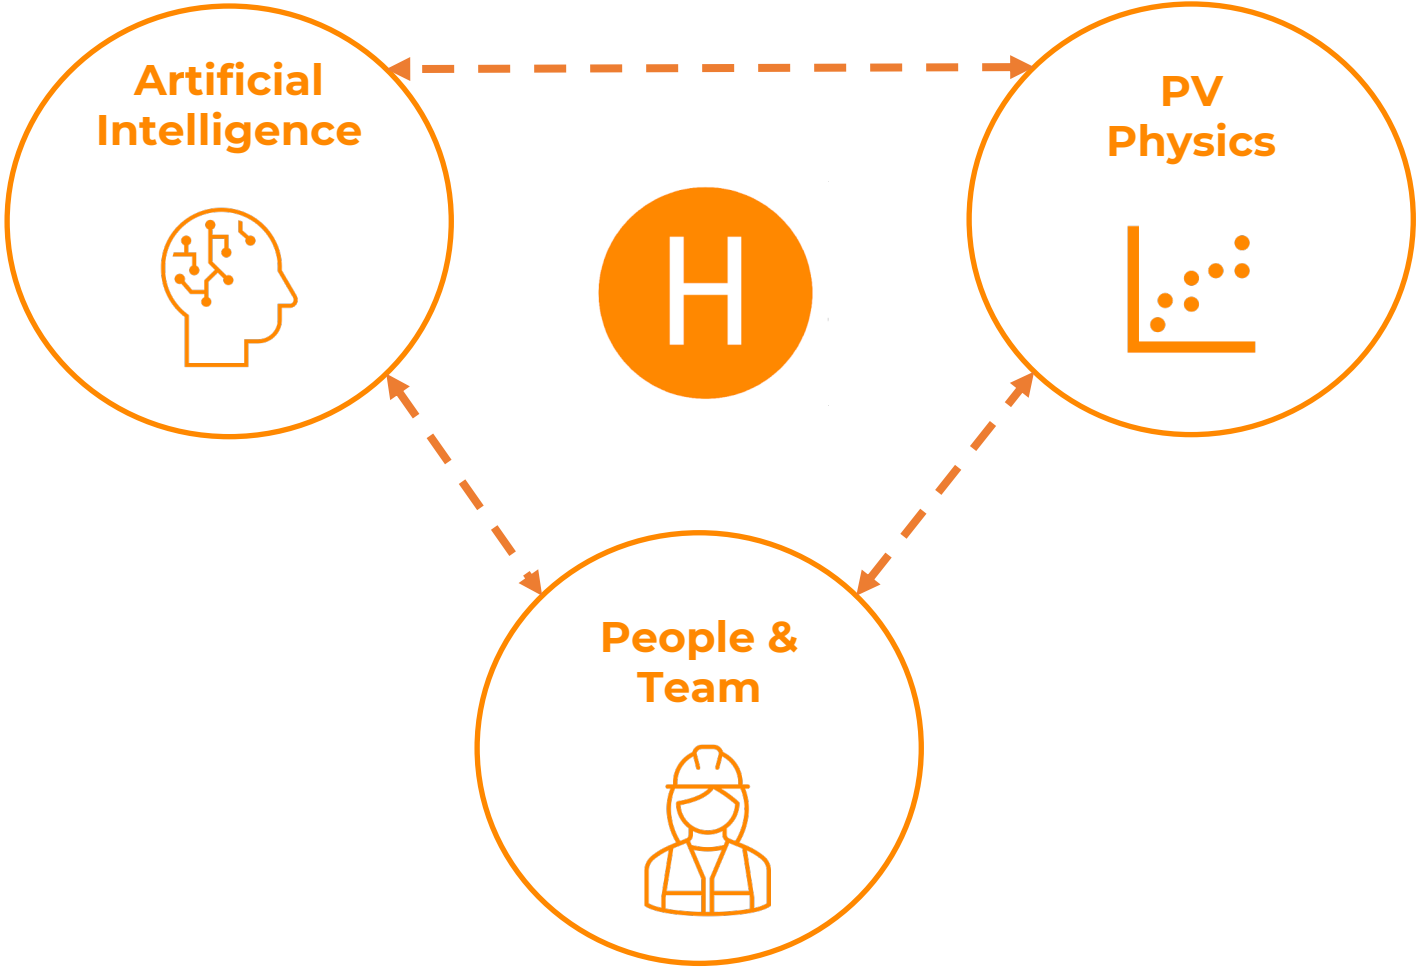

# Physics-Informed AI to Empower People

Trust

Transparency
