Delivered Systems

> 400 TSD.  
Delivered kWh

> 150 MIO.  
Turnover in EUR  
(2023e)

# Next Mobility Hub

## Integrated and intelligent energy concept

- Battery storage: Combination of self-consumption and flexibilization
- Best possible use of renewable energies on site
- Revenue opportunities through price-optimized, flexible generation, storage and use of energy.
- Scalable model also for other hubs
- FEMS based on openEMS
- 1<sup>st</sup> Life Car Batterys
