# The future of intelligent energy management with SolaX XHub

**Rudolf Schell**

Senior Training Expert  
SolaX Power

# Welcome!

Do you have any questions?  

Send them in via the Q&A tab.  We aim to answer as many as we can today!

You can also let us know of any tech problems there.

We are recording this webinar today. 

We'll let you know by email where to find it and the slide deck, so you can re-watch it at your convenience.  

# XHP

# Core Value

Intelligent, Multi-purpose,  
Energy Controller

PARTNER

# ONE-STOP SMART MANAGER

*Simplifying Life, Maximizing Savings*

PARTNER

# SMART ENERGY MAXIMUM PROFIT

*SolaX end-to-end smart PV-ESS-EV-HP ecosystem maximizes energy efficiency and ROI.*

EARN

**50<sup>+</sup>%**

## ENERGY DISPATCH - GRID FRIENDLY CONTROL

**SOLAX**  
POWER

Three-phase  
Unbalance\*

Support § 14a EnWG  
& § 9 EEG

OpenADR,  
IEEE 2030.5

SunSpec

Ripple Control

DRM

XHub complies with key international regulations and supports VPP, avoiding risks while creating additional revenue.

## EASY INSTALLATION: ALL-IN-ONE

**SOLAX**  
POWER

- Replace the smart meter
- Supports BOTH Direct Connection and CT
- One for Grid connection point, one for third party inverter
- 7Pitch rack installation compatible with the distribution box
- Support LAN or WiFi
- Magnetic WiFi Antenna
- Bluetooth 5.1 for easy network configuration
- Seamless Upgrade with Meter's RS485

# Product Introduction

SolaX Unified Energy Brain,  
Edge-cloud Synergy for Smarter Energy

## WHAT CAN XHUB DO?

**SOLAX**  
POWER

### 01 Hitting user pain points

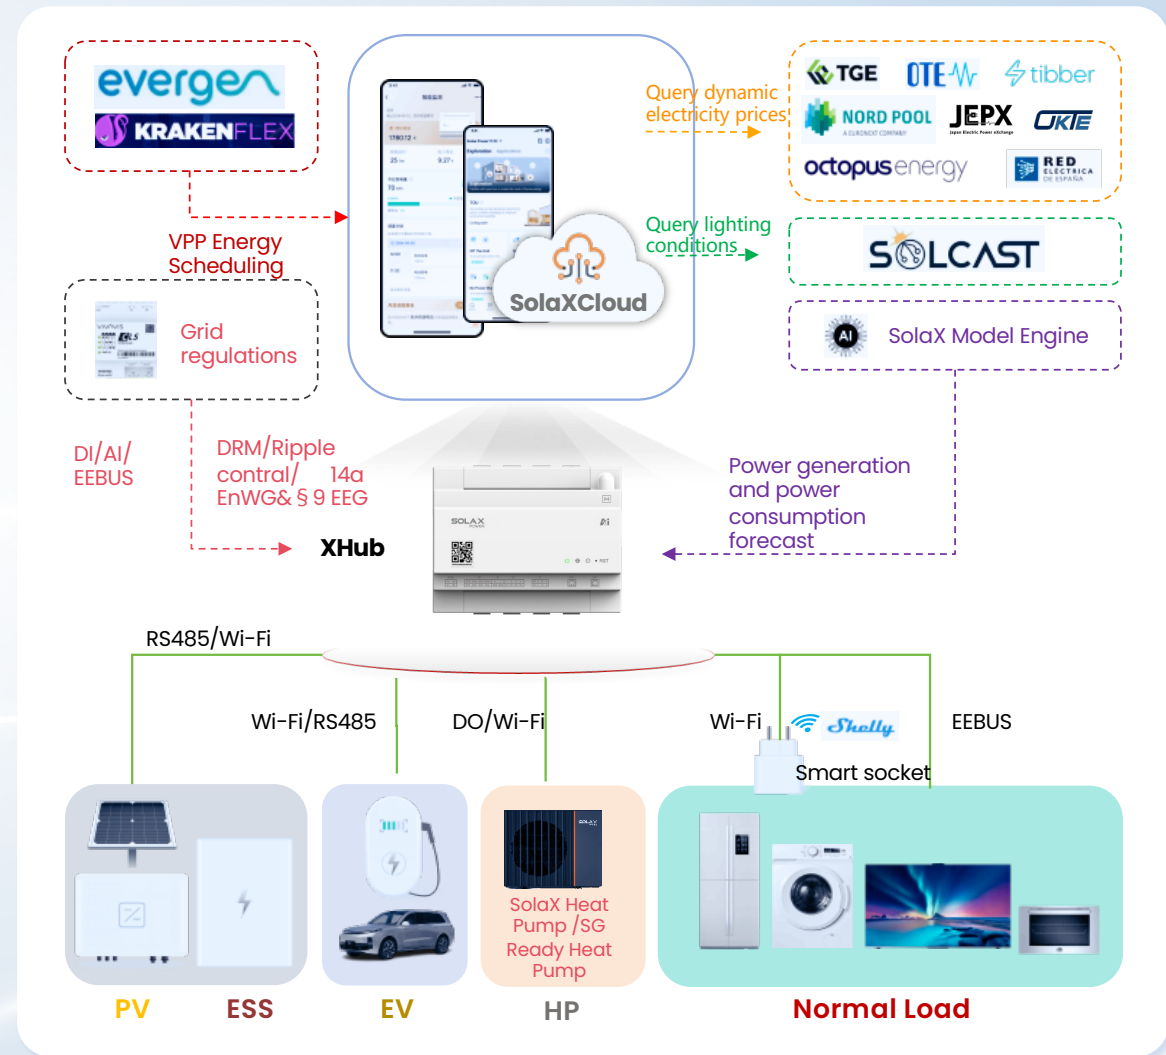

- by **50%+** compared with self-generation and self-consumption
- **one-stop management** of PV-ESS-EV-HP and other loads
- **Grid-Ready:** Supports Ripple Control, DRM, \$14a EnWG, \$9 EEG
- **Fully Customizable** to Fit Your Needs

### 02 Install and enjoy

- **Simple installation:** DIN-rail installation, one-click Bluetooth network configuration, and fast cloud access
- **Automatic identification:** One-click scanning makes it easy to bring home energy devices under control

### 03 Visual management ( APP&WEB )

- **24/7 Smart Butler:** AI updates the scheduling schedule in real time based on dynamic electricity prices, weather, etc.
- **Statistics and forecasts:** Real-time updates of AI-generated revenue, power generation, and power consumption forecast data
- **Monthly Report:** Automatically generate home energy reports and user behavior recommendations

# 2-1 Product Introduction

Energy Management

# ENERGY MANAGEMENT – ENERGY HUB, AGGREGATE MANAGEMENT

**SOLAX**  
POWER

- Energy core
- Key loads
- Smart home extension and future ecology
- Grid-friendly

# ENERGY MANAGEMENT – ONE-STOP MANAGEMENT OF PV, ESS, EV, HP AND OTHER USE, VISIBLE, MANAGEABLE AND CONTROLLABLE

**SOLAX**  
POWER

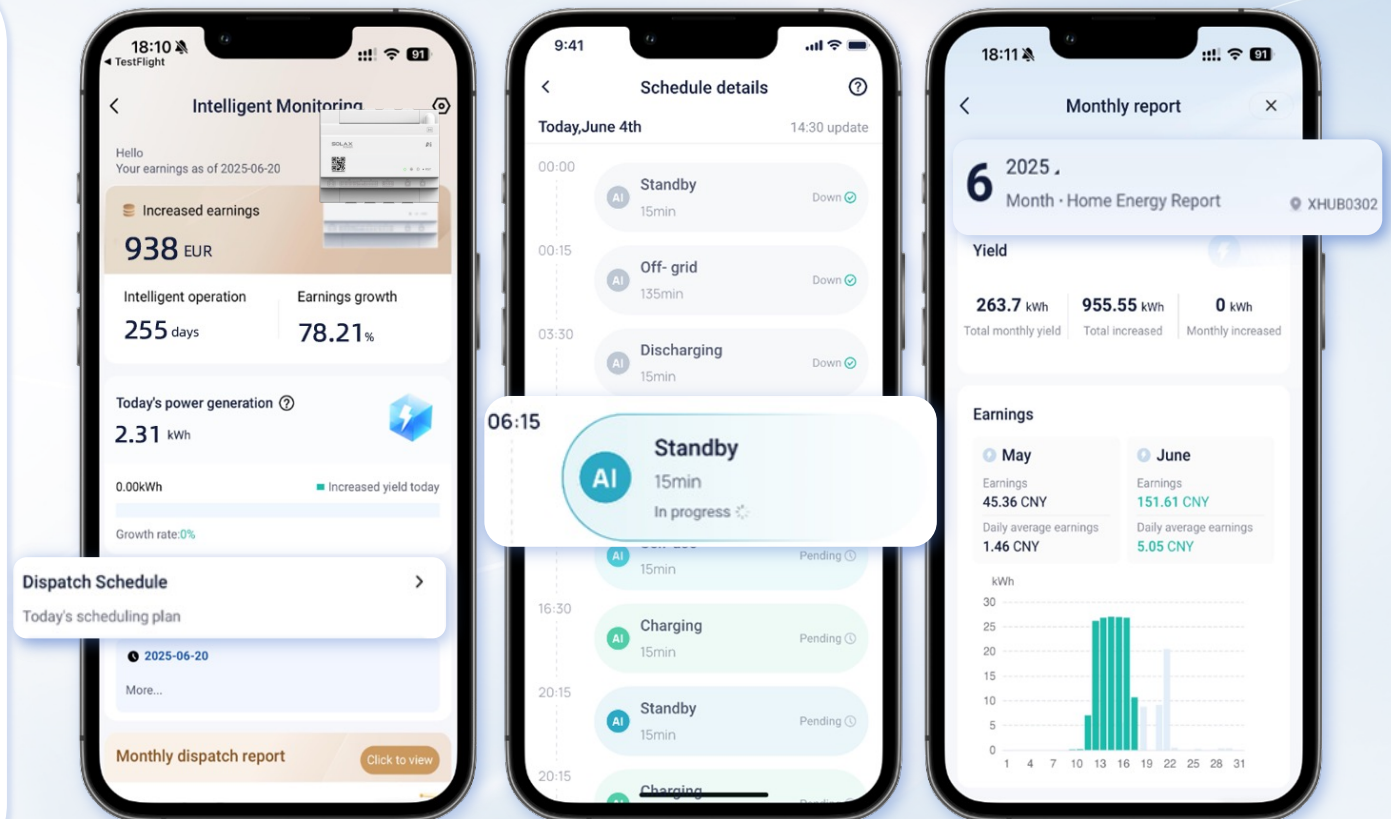

## One-stop management

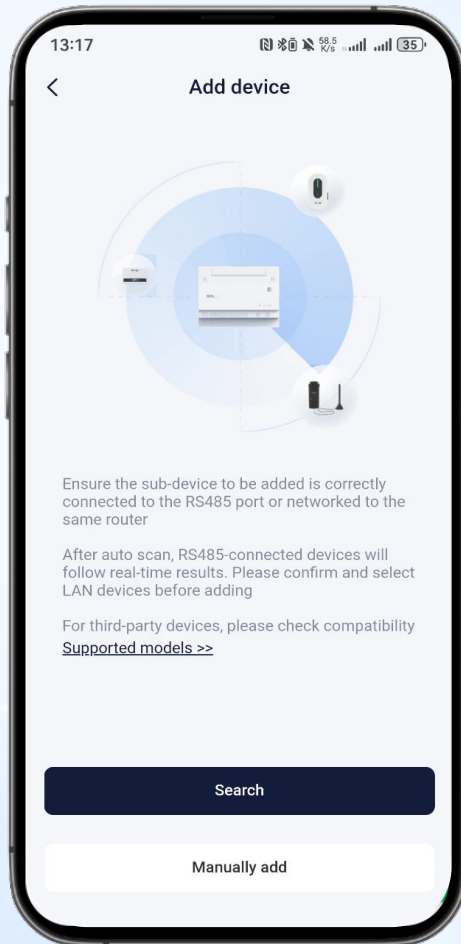

- One-stop management
- Card-style, one-screen display

Daily monitoring and statistics after AI is enabled

## Daily monitoring and statistics

- Daily monitoring and statistics after AI is enabled: increased revenue , increased energy , and schedule
- Updates the full-day AI schedule every 15 minutes.
- Monthly report is automatically

### System sub-device management

- One-click scanning of sub-devices, automatic addition
- Drag and drop to complete the load priority setting

[视频][视频][视频]

## SMART ENERGY MANAGEMENT – LOAD SIDE- ONE-CLICK SCAN + CONTROLLABLE LOAD PRIORITY

Remaining green  
power

Charging pile / other controllable load starting power

Green electricity distribution is carried out according to user-set priorities to maximize the use of green electricity and reduce electricity costs

Note: XHub will only perform overall control of the controllable load

# X-ENERGY MANAGEMENT: 8 WORK MODE

9:41

XSchedule

Intelligently predict and optimize your household electricity strategy based on usage patterns, sunlight availability, electricity pricing, and other contextual factors

Estimated potential earnings increase

## KEY FEATURES-METER & CT CHECK

**SOLAX**  
POWER

To address common on-site issues such as polarity reversal and incorrect phase sequence, the system can detect and identify these problems based on various feedback signals.

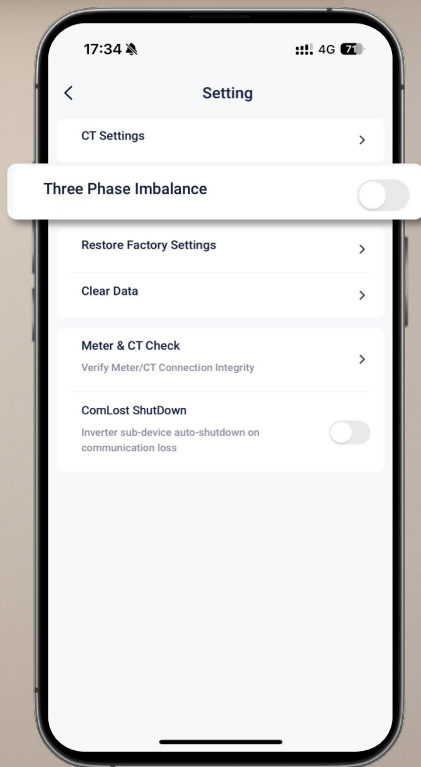

When using the internal-CT function, it can automatically adapt without the need for manual rewiring.

# ENERGY MANAGEMENT: INV SIDE- SYSTEM-LEVEL THREE-PHASE IMBALANCE

SOLAX  
POWER

Three phase Unbalance.

To improve the utilization rate of photovoltaic power generation and save more electricity

## ONE-STOP MANAGEMENT—INTEGRATED PV, STORAGE, CHARGING, AND HEATING SOLUTION

Type	Mode	Status
Storage Inverter	X1-HYBRID-G4	coming soon
	X3-HYBRID-G4	released
	X1-IES	released
	X3-IES	released
	X3-ULTRA	coming soon
	X3-HYB-G4 PRO	released
	X1-VAST	coming soon
On grid Inverter	X3-IES-P	coming soon
	X1-SMART G2	coming soon
	X1-MINI G4	
	X1-BOOST G4	
	X3-PRO G2	
	X3-MIC G2	released
EVC	X1/X3-HAC、C1-HAC、A1-HAC	released
Heat Pump	STU-290	released
Plug (Shelly)	Shelly Plus Plug S	released
	Shelly Plug S MTR GEN3(White)	
	Shelly Plug S MTR GEN3(Black)	
	Shelly Outdoor Plug S GEN3	
	Shelly Plus Plug UK	

# 2-2 Product Introduction

Energy Dispatch

# THE PROBLEM OF TRADITIONAL ENERGY DISPATCH

## 1 Influencing Factors

### | Environmental changes

Changes in ambient light, temperature, etc., lead to changes in PV generation

### | Load changes

The daily load power curve varies, es

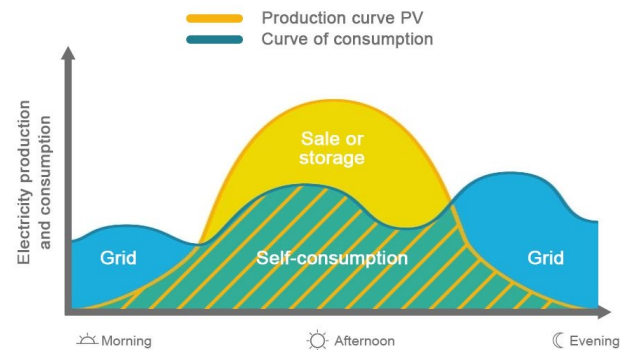

### | Electricity price changes

The electricity price changes frequently

## 2 Traditional solutions

### Self-consumption

### Time of Use

## 3 Problems

### Rigid Constraints

Fixed logic fails to adapt to changing environment, load, or prices

### Slow Response

Delayed adjustments cause missed opportunities and revenue loss

### Manual Bottlenecks

Preset rules block agile, automated optimization.

### Limited Revenue

Static models can't capture dynamic market gains

# SMART SCHEDULE EDGE-CLOUD SYNERGY, FASTER AND MORE ACCURATE DECISIONS

Faster and More Accurate Decisions **millisecond-level** response. **>96%** forecast accuracy

## Cloud Advantage

Integrate

SolaXCloud

**>96%**  
forecast accuracy

Cloud-edge collaboration

## Edge Advantage

- Local data synchronization and scheduling optimization with **millisecond-level response**.
- On-device AI computing, **immune to network instability and latency**.

## Real-time

Strategy output

Power Forecasting

Strategy optimization based on electricity pricing

# ENERGY SCHEDULING – SMART SCHEDULE CLOUD-EDGE COLLABORATION, 24/7 SMART HOUSEKEEPER

Comparison of  
program benefits

## Program Overview

- 15- Minutes PV forecast
- 15- Minutes load power consumption forecast
- 15-Minutes Optimal Strategy Generation

## Solution Advantages

### 96% Accuracy

in PV & Load Forecasting—Powered by  
Global Data and Deep Learning

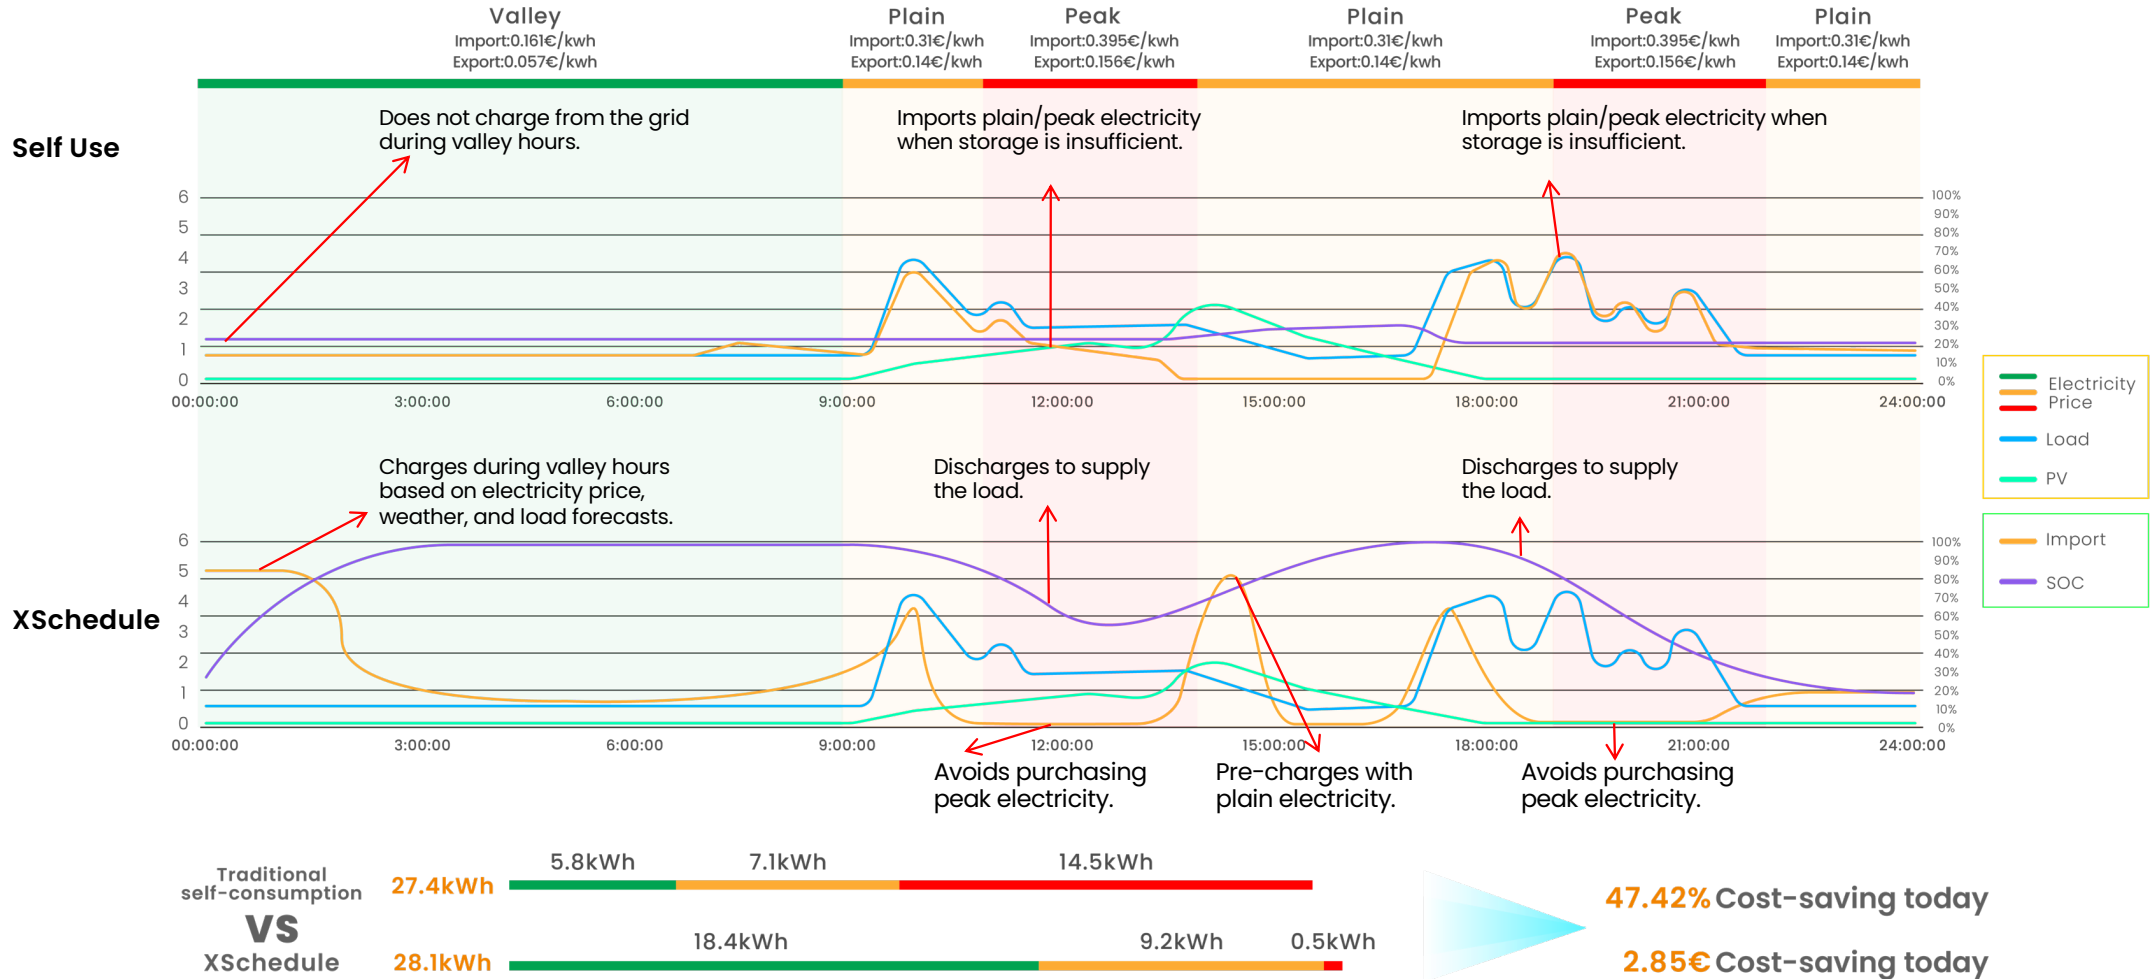

### 50%+ Revenue Uplift

Adaptive real-time scheduling for  
maximum returns

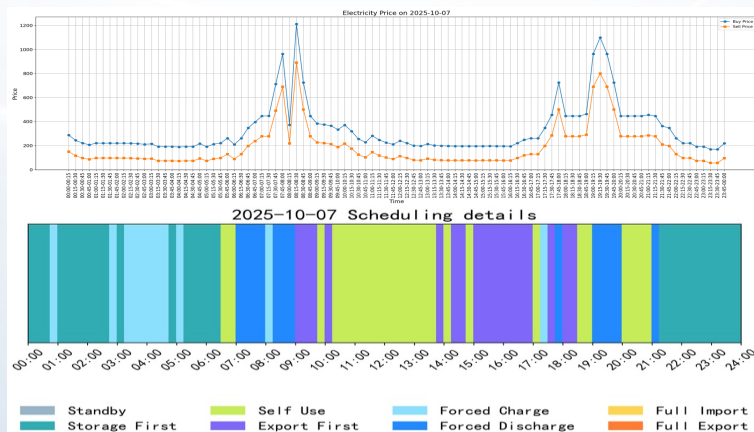

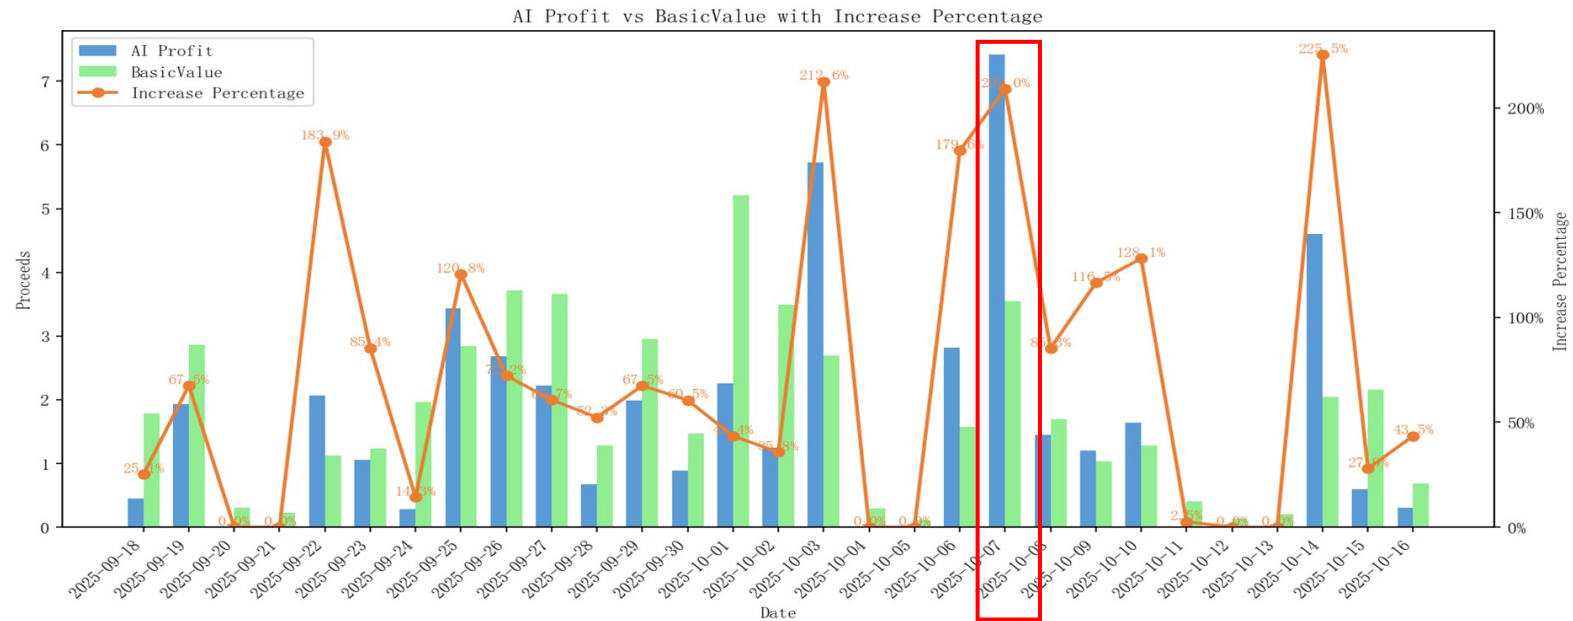

### Adaptive & Iterative

Relentless Optimization in Action.

# TRADITIONAL VS XSCHEDULE

# ACTUAL SITE REVENUE CASE

Date: 7/10/2025  
Increase Percentage: 209.01%

Country: Estonia  
Stie info: X3 Hybrid G4 + 4\*T58  
Electricity price setting:  
Electricity selling commission fee: 0.08  
Electricity purchase distribution fee: 1.00  
Electricity purchase tax rate: 25%  
Currency: EUR  
Company: NORDPOOL

# 3 Application

Comprehensive Green PV-ESS Solutions  
—Maximize Your Energy Returns

## PV-ESS-EV WHOLE-HOME LOAD SOLUTION

**SOLAX**  
POWER

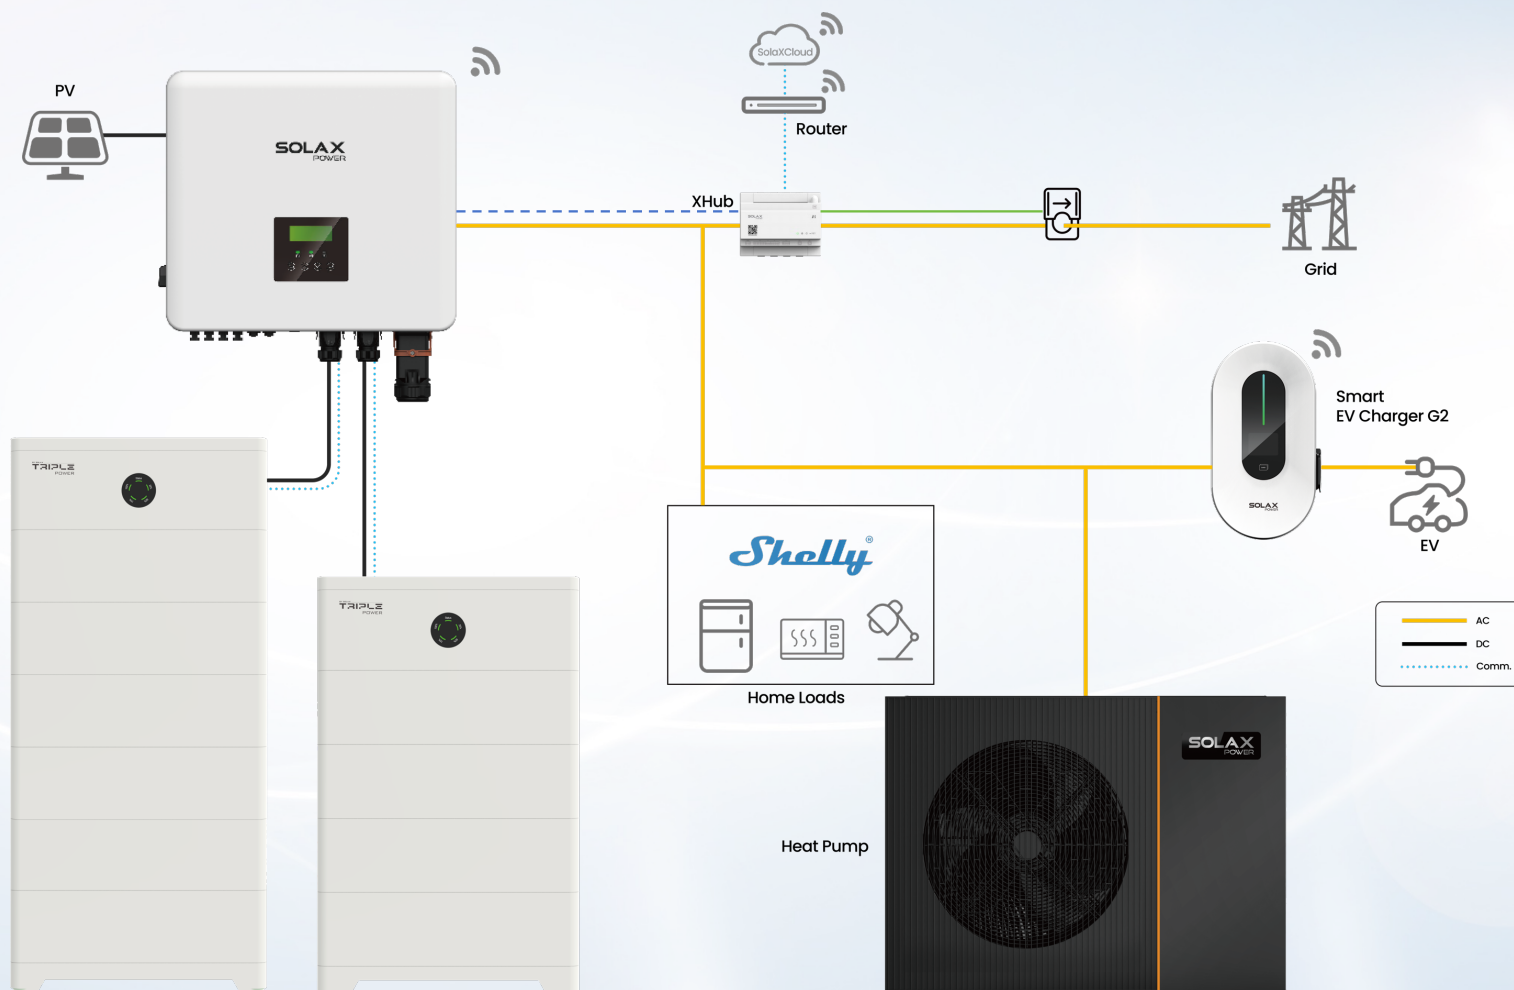

### Solution Description

- Comprehensive PV-ESS-EV-LOAD Solution Support
- For Loads Below 80 A, Just Replace the Meter—Fast, Hassle-Free Installation
- Parallel inverter scenarios are not currently supported

## PV-ESS-EV WHOLE-HOME LOAD SOLUTION (EXTERNAL CT)

**SOLAX**  
POWER

### Solution Description

For loads exceeding 80 A , connect the original meter's power line to AC IN only (do not link it to AC OUT), and select the appropriate CT, current support(40ma/100A/200A/400A/600A)

# Implementation

Rapid Installation,  
Seamless Third-Party Integration,  
and Uncompromising Data Protection

## THIRD-PARTY ECOSYSTEM CONSTRUCTION

**SOLAX**  
POWER

### Smart Home Ecosystem

Official Home Assistant Integration for Shelly  
Seamless plug-and-play control for a truly connected smart home

### Data Services and Dynamic Integration

Dynamic pricing + weather forecasting + VPP connectivity for precise, future-ready energy control

**30+**  
Regions

### Third-party inverter control and heat pump linkage

Supports third-party inverters retrofit and SGReady/EEBUS heat pump connectivity

### EEBUS Alliance Ecosystem

Seamless integration with smart home appliances via EEBUS protocol

## COMPLIANCE CERTIFICATION PRACTICES

### **ISO 27001 Certification**

Certified on July 29, 2025

- This standard was proposed and revised by the BSI.
- By conducting timely regulatory audits and ensuring that the organization's information management system remains robust, allowing customers to truly experience the company's commitment to information security.

**NO.1** in industry

### **The SOC 2 TYPE 2 Certification**

Certified on July 31, 2025

- The SOC 2 TYPE 2 Assurance Report evaluates the security, availability, processing integrity, confidentiality, and privacy protection of SolaXCloud's business operations.
- The report is based on the Trust Services Criteria (TSC) from the American Institute of Certified Public Accountants (AICPA), with Ernst & Young

### **EN18031 Certification**

Certified on July 30, 2025

- EN18031 focuses on protecting sensitive data (such as customer information) and complies with GDPR and relevant EU regulations.
- Complementary to ISO 27001, this standard enhances cybersecurity and ensures that organizations handling personal or confidential information comply with relevant regulatory requirements.

**PSTI**

### **PSTI Certification**

Certified on August 05, 2025

- PSTI regulations require built-in security protections and update mechanisms to proactively defend against cyber threats and protect data security and system stability.
- We provide security updates across the entire product lifecycle, preventing premature device retirement due to vulnerabilities and ensuring long-term protection for customers' investments.
